Cut and Paste your Citations into Hyperlinks

All databases provide a Cite button when you call up an article:

Note that you can cite and copy an article’s citation, request a permalink and put the permalink in a hyperlink. If you put the citation in a bibliography, it will be a hyperlink for you and your professor to find the article.

Highlight and add the permalink into the hypertext field. The link will look like:

```
https://msm.on.worldcat.org/oclc/5157047462
```
